

communications systems

More communications options exist today than ever before and whether for business, personal, or entertainment purposes, the immense array of system features and service provider choices can be overwhelming.

Whether you need to upgrade your business communication system to handle the latest multimedia, or you want to install a satellite dish system at your home, Marchand Technologies can help design the best system for you. Our experts will educate and support you during each step of the process, so there are no surprises or hidden costs. Our technicians are trained to familiarize themselves with state-of-the-art equipment long before it becomes mainstream, so we are able to maintain a network of highly skilled professionals who have the knowledge to help you design a system that addresses your communication needs.

We take the time to thoroughly understand your needs and goals before we lay a wire. This ensures you receive a customized system that runs as smoothly today as it will tomorrow and can easily be upgraded if you choose to do so down the line.

Marchand Technologies designs the following communications systems:

- Phone Systems
- Video Surveillance/DVR
- Internet Telephony
- Intercom Systems
- Television/Internet Solutions and Installation
- DirecTV/TIVO/HDTV
- Dish Network
- Cable TV
- Roof Mount Antennas
- DSL
- Cable
- ISP Providers/Email/Web Hosting

From concept to full service installation, from designing service plans to performing follow-up maintenance and support, Marchand Technologies can help build out and install an optimal communications system for you efficiently— both on-budget and on-time.
