

surveillance system

A surveillance system from Marchand Technologies will allow you to spend more time viewing your stored video clips instead of searching. Scan recorded video in seconds rather than hours, stop wasting space storing stacks of tapes, and start enjoying better playback quality as well as remote viewing. Go digital with a modern, nimble video system designed by Marchand Technologies.

The seasoned experts at Marchand Technologies have the highest degree of knowledge about the equipment that integrates into your video system. We take the time to help you decipher the optimal combination that will fulfill your needs, and take a consultative approach that makes certain you understand all your available options.

Our digital video recording (DVR) systems offer several advantages over traditional technologically-dated VCR systems:

- No tapes to change
- Better playback picture quality
- Quicker search of recorded images, in seconds rather than hours
- Remote viewing and recording from any off-site location
- Expanded storage capabilities
- Lower maintenance

At Marchand Technologies, we customize video systems for small homes, large homes and businesses, and will specially-design a system for virtually any need. Our systems help prevent crime, ensure job site safety, and will help you feel more connected with family when you are apart.

In fact, a University of Florida study recommends the installation of surveillance cameras prevent employee theft.

Additional video systems capabilities:

- Keep an eye on your children at home or at daycare to ensure their security
- Business video conferencing, to ensure your connectivity
- View pets while you are at work or on vacation, to ensure their well-being
- Monitor your home or house sitter while you're away, to ensure your home's security

Contact us today to see how an investment in a surveillance and video system installed by Marchand Technologies will exceed your expectations.
